

Technical Data Sheet

Product: AA108

THE EDGE
ON SAFETY

DESCRIPTION

Long Front Square, Stairnosing Profile. This profile is designed for use with vinyl covered stairs. The back rebate on this profile is designed to cover the joint. The profile has a 44mm right angle drop riser and is suitable for interior and exterior uses.

MATERIAL

T6 6063 Alloy aluminium - Natural Satin anodised.

Standard 3.66 Metre Lengths.

1 x 43mm Tredsafe Insert.

Supplied pre drilled for countersunk screw fixing (screws supplied).

DIMENSIONS

EXAMPLE

In this example, AA108 has been installed with 2mm vinyl, the back rebate hides the joint and prevents the trip hazard. The profile has been drilled and countersunk into the uncovered stair. This installation has used slip resistant Tredsafe Diamondtred insert for safety, which meets standards of AS/NZS 3661.1:1991 and NZS 4586:2013 for slip resistance.

Information given in this data sheet is based on the current state of knowledge. This does not exempt the purchaser from carrying out his own careful inspections of incoming goods and their suitability for local building codes. We reserve the right to make changes to the product data in the course of technical progress or due to operationally related further development. Owing to factors beyond our control during application, recommendations given in this data sheet require tests and experiments by the customer. Our recommendations do not exempt the customer from the obligation to check any infringements of third-party rights himself and eliminate them if necessary. The suggestions for product use are not equivalent to a warranty of its suitability for the recommended purpose.

Each new release of this data sheet supersedes the previous one.
