

Technical Data Sheet

Product: UP121

THE EDGE
ON SAFETY

DESCRIPTION

Rigid PVC Stairnosing Profile designed for carpeted stairs, available in charcoal and black. This stair nosing product has been designed with a built in packer and lip on the back edge to simplify installation with direct stick carpets. This profile has a 38mm bull nose drop riser and is suitable for interior use only.

MATERIAL

Rigid PVC (Black or Charcoal). Suitable for interior use only.

Standard 3.66 Metre Lengths.

1 x 43mm Tredsafe Insert.

Supplied pre drilled for countersunk screw fixing (screws supplied).

DIMENSIONS

EXAMPLE

In this example, UP121 has been installed on top of carpet tile. The recessed back edge allows carpet to sit underneath. This installation has used slip resistant Tredsafe Diamontrred insert for safety, which meets standards of AS/NZS 3661.1:1991 and NZS 4586:2013.

Release: January 2019

Information given in this data sheet is based on the current state of knowledge. This does not exempt the purchaser from carrying out his own careful inspections of incoming goods and their suitability for local building codes. We reserve the right to make changes to the product data in the course of technical progress or due to operationally related further development. Owing to factors beyond our control during application, recommendations given in this data sheet require tests and experiments by the customer. Our recommendations do not exempt the customer from the obligation to check any infringements of third-party rights himself and eliminate them if necessary. The suggestions for product use are not equivalent to a warranty of its suitability for the recommended purpose.

Each new release of this data sheet supersedes the previous one.
