

# Technical Data Sheet

## Product: DT027

THE EDGE  
ON SAFETY

### DESCRIPTION

Floor finishing trim strip designed for carpet to vinyl height transitions. This profile is suitable for 2mm height variations and provides a gradual ramp. Available in natural satin finish, suitable for interior or exterior use. This profile is designed to hold a singular 13mm anti slip insert.

### MATERIAL

T6 6063 Alloy aluminium - Natural Satin anodised.

Standard 2.5 Meter Lengths.

13mm Tredsafe Insert.

Supplied pre drilled for countersunk screw fixing.

### DIMENSIONS

### EXAMPLE

This profile has been used as a transition strip between LVT and carpet. This profile has used a 13mm slip resistant Tredsafe Diamondtred insert for safety, which meets standards of AS/NZS 3661.1:1991 and NZS4586:2013.

Release: January 2019

Information given in this data sheet is based on the current state of knowledge. This does not exempt the purchaser from carrying out his own careful inspections of incoming goods and their suitability for local building codes. We reserve the right to make changes to the product data in the course of technical progress or due to operationally related further development. Owing to factors beyond our control during application, recommendations given in this data sheet require tests and experiments by the customer. Our recommendations do not exempt the customer from the obligation to check any infringements of third-party rights himself and eliminate them if necessary. The suggestions for product use are not equivalent to a warranty of its suitability for the recommended purpose.

Each new release of this data sheet supersedes the previous one.
