

## DESCRIPTION

This detail trim is designed to create a clean transition between hard flooring heights. This profile is suitable for 2mm or 4mm height variations. The profile is supplied with double sided self-adhesive backing tape for fixing. This profile is suitable for interior and exterior uses.

## MATERIAL

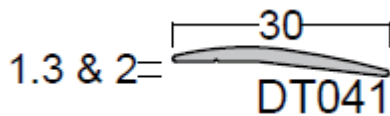

Aluminium

Standard 2.5 Metre Lengths.

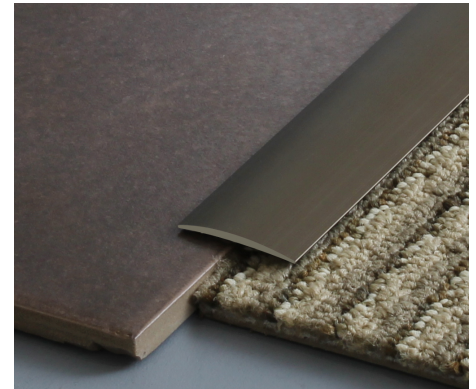

Supplied with double sided self adhesive backing tape.

## DIMENSIONS

## EXAMPLE

In this example DT04# has been used with tile and carpet tile with a height difference of 2mm. This profile allows for a smooth transition and removes the potential trip hazard.

For PDF and CAD drawings with full dimensions and installation guides, please refer to our website [www.tredsafe.co.nz](http://www.tredsafe.co.nz)

Release: January 2019

Information given in this data sheet is based on the current state of knowledge. This does not exempt the purchaser from carrying out his own careful inspections of incoming goods and their suitability for local building codes. We reserve the right to make changes to the product data in the course of technical progress or due to operationally related further development. Owing to factors beyond our control during application, recommendations given in this data sheet require tests and experiments by the customer. Our recommendations do not exempt the customer from the obligation to check any infringements of third-party rights himself and eliminate them if necessary. The suggestions for product use are not equivalent to a warranty of its suitability for the recommended purpose.

Each new release of this data sheet supersedes the previous one.
