

Technical Data Sheet

Product: DT069

THE EDGE
ON SAFETY

DESCRIPTION

This detail trim is designed as a protective wall skirting trim for covered 2mm vinyl. This profile is suitable for both interior and exterior uses and is extensively used in aged care facilities and hospitals.

MATERIAL

T6 6063 Alloy aluminium - Mill Finish.

Standard 2.5 Metre Lengths.

DIMENSIONS

EXAMPLE

In this example, DT069 has been installed with 2mm covered vinyl. This creates an easy to clean and tidy finish. The profile provides impact protection for the wall.

For PDF and CAD drawings with full dimensions and installation guides, please refer to our website www.tredsafe.co.nz

Release: January 2019

Information given in this data sheet is based on the current state of knowledge. This does not exempt the purchaser from carrying out his own careful inspections of incoming goods and their suitability for local building codes. We reserve the right to make changes to the product data in the course of technical progress or due to operationally related further development. Owing to factors beyond our control during application, recommendations given in this data sheet require tests and experiments by the customer. Our recommendations do not exempt the customer from the obligation to check any infringements of third-party rights himself and eliminate them if necessary. The suggestions for product use are not equivalent to a warranty of its suitability for the recommended purpose.

Each new release of this data sheet supersedes the previous one.
