

# Technical Data Sheet

## Product: DT080

THE EDGE  
ON SAFETY

### DESCRIPTION

Aluminium ramp finishing trim. This product has been designed for use with 17mm Connex matting when installed without a mat well. Suitable for interior and exterior uses, suitable for 15mm height variations.

### MATERIAL

T6 6063 Alloy aluminium - Powder Coated Black

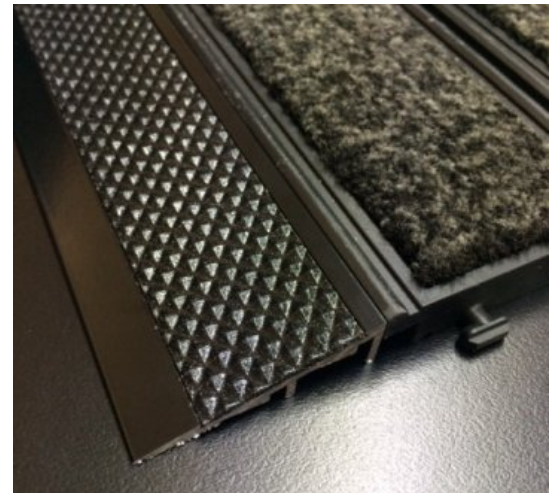

Standard 2.5 Metre Lengths.

### DIMENSIONS

### EXAMPLE

In this example, DT080 has been installed with Tredsafe Connex to provide a smooth transition between Connex and bare floor.

For PDF and CAD drawings with full dimensions and installation guides, please refer to our website [www.tredsafe.co.nz](http://www.tredsafe.co.nz)

Release: January 2019

Information given in this data sheet is based on the current state of knowledge. This does not exempt the purchaser from carrying out his own careful inspections of incoming goods and their suitability for local building codes. We reserve the right to make changes to the product data in the course of technical progress or due to operationally related further development. Owing to factors beyond our control during application, recommendations given in this data sheet require tests and experiments by the customer. Our recommendations do not exempt the customer from the obligation to check any infringements of third-party rights himself and eliminate them if necessary. The suggestions for product use are not equivalent to a warranty of its suitability for the recommended purpose.

Each new release of this data sheet supersedes the previous one.
