

Technical Data Sheet

Product: AA208

THE EDGE
ON SAFETY

DESCRIPTION

Natural Satin Anodised Aluminium Stair Nosing. This profile is designed for use on uncovered concrete or wooden stairs. The profile has a 36mm universal riser and is suitable for interior and exterior uses. The profile has a rebated back edge to hide the joint with 2mm vinyl.

MATERIAL

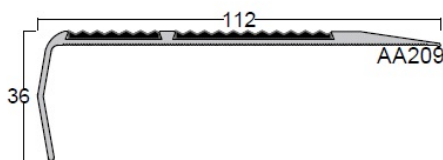

T6 6063 Alloy aluminium - Natural Satin anodised.

Standard 3.66 Metre Lengths.

1 x 43mm and 1 x 25mm Tredsafe Inserts.

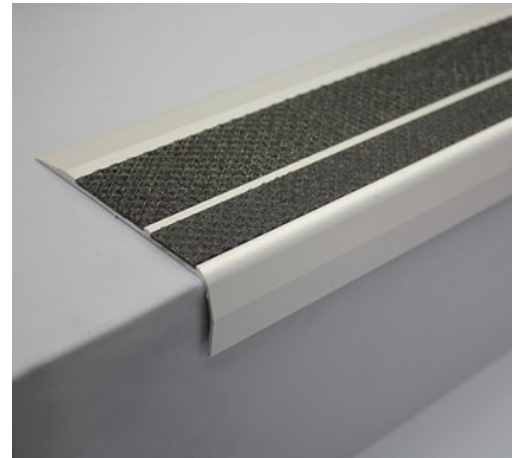

Supplied pre drilled for countersunk screw fixing (screws supplied).

DIMENSIONS

EXAMPLE

In this example, AA209 has been installed on an uncovered concrete floor. This installation has used slip resistant Tredsafe Diamondtred insert for safety, which meets standards of AS/NZS 3661.1:1991 and NZS 4586:2013.

Release: January 2019

Information given in this data sheet is based on the current state of knowledge. This does not exempt the purchaser from carrying out his own careful inspections of incoming goods and their suitability for local building codes. We reserve the right to make changes to the product data in the course of technical progress or due to operationally related further development. Owing to factors beyond our control during application, recommendations given in this data sheet require tests and experiments by the customer. Our recommendations do not exempt the customer from the obligation to check any infringements of third-party rights himself and eliminate them if necessary. The suggestions for product use are not equivalent to a warranty of its suitability for the recommended purpose.

Each new release of this data sheet supersedes the previous one.
